TOTALS:			\$408.00	\$0.00	\$0.00

DIAGNOSIS CODES

I48.91 Unspecified atrial fibrillation
R00.2 Palpitations
I10 Essential (primary) hypertension

ADJUDICATION

STATUS: DENIED - NO PAYMENT ISSUED

CARC CO-50 These are non-covered services because this is not deemed a "medical necessity" by the payer.

RARC N115 This decision was based on a Local Coverage Determination (LCD).

PROVIDER NOTES ON FILE

Patient presented on 07/14/2026 with a three-week history of intermittent palpitations, lightheadedness on exertion, and one witnessed near-syncopal episode at home. Resting heart rate on arrival was 128 bpm and irregularly irregular. The ECG performed in office confirmed atrial fibrillation with rapid ventricular response and was the basis for same-day initiation of rate control

and anticoagulation, avoiding an emergency department transfer.

Documentation supporting medical necessity, including the ECG tracing, vital signs flowsheet, and the physician's progress note, was submitted with the original claim on 07/16/2026.

APPEAL RIGHTS
